

Diamonds are a Floor's Best Friend

**QUANTUM X™ TECHNOLOGY:
INDUSTRY-LEADING RESISTANCE TO
SCRATCHES, STAINS, AND DENTS.**

A coveted symbol of beauty and longevity, diamonds are one of nature's hardest surfaces.

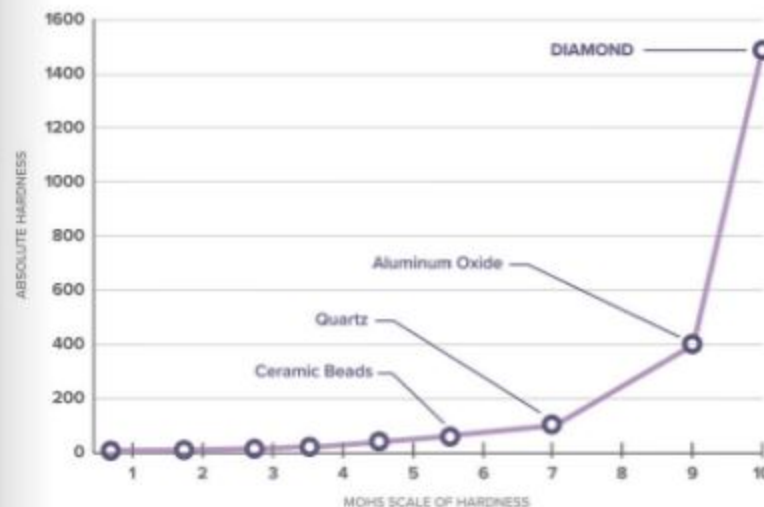

With their unrivaled strength, real diamonds are the key ingredient in our Quantum X™ Technology, which provides unparalleled protection for our floors.

The double UV Fade coating ensures the product is flame-resistant, stain resistant, scratch resistant, and indent resistant so your floor stays looking as good as it did when it was installed.

Look for the "Protected By Quantum X Technology" Badge to signify the very best in flooring protection.

PROTECTED BY
QUANTUM X TECHNOLOGY

MEASURING SCRATCH RESISTANCE

The Mohs scale of mineral hardness rates the scratch resistance of various minerals. While many flooring products utilize materials such as Aluminum Oxide, Quartz, and Ceramic Beads for durability, Diamonds dwarf those elements on the Mohs scale.
